Reduce IT costs

Enhance your business
portfolio

Protect your business

Protect your customers

When you're looking for a partner to help you deliver your software applications as a service, you need a secure, reliable and established data centre, uniquely backed up by expert advice and guidance.

EDP's application hosting service is the cost-effective, flexible and secure delivery model for your hosted software applications.

Make your customers transition to SaaS as smooth as possible with EDP Partner Application Hosting

Deploy your Software as a Service and enjoy all the benefits of software delivery without the complex infrastructure costs ... Use our expertise to help you achieve your goals.

From hosting critical business applications to disaster recovery, EDP can support your evolving business needs. Established in 1965 and having developed and delivered online services since 1999 from our own purpose built data centre, we offer you the most secure, efficient and cost-effective hosting service that is guaranteed to meet the increasing demands of your customers.

Our Pedigree

We deliver experience, expertise and first class service to over 6,000 concurrent hosted application users. Satisfied clients ranging from £1m to £1bn turnover (primarily merchant operations who rely upon high volume, real-time order processing - online or at trade counters), benefit from instant access, up-time, speed and security - all vital factors to most business sectors. Plus, you will feel safe and secure in the knowledge that EDP cover all these in a standard SLA.

Immediate benefits of the EDP Partner Application Hosting Promise:

- Reduce IT cost; Remove hardware costs .
- Instantly and regularly deliver new features, bug fixes and application enhancements.
- Speedy deployment and ease of configuration resulting in instant access.
- Low cost /low risk startup option.
- Shared revenue model, per user, per month.
- Highest level security encryption and backup service.

Drive revenue with new product offerings

Offer your customers new services through EDP's application hosting service:

SOFTWARE as a SERVICE

SaaS - the easy, affordable alternative to managing your own software.

With EDP's Software as a Service (SaaS), deploy the benefits of your software applications without the infrastructure costs and ongoing implementation or management headaches.

DISASTER RECOVERY & BUSINESS CONTINUITY

What if the worst were to happen to your customers? Fire, theft, flood, power failure, vandalism or data hacking? Lost time can mean lost revenue, lost profits or even a loss of an organisation itself. Protect your customers from disaster with DR & Business Continuity service, enabling your customers to recover their businesses within hours.

ONLINE BACKUP

Reliable data backups are the cheapest insurance an information dependent business can buy. So protect your customers from the risk of data loss with a managed, high-security, offsite back-up solution. Automatically backup essential data from Windows servers, PCs, laptops and workstations to our secure offsite data centre. Peace of mind at an affordable price.
